Codan’s Envoy HF Radio delivers dependable, clear, trouble-free voice, messaging and data communications, without dependence on existing infrastructure. Now with Codan’s second generation Digital Voice technology, Envoy provides outstanding voice clarity in conditions where competing HF radios fail.

EXCEPTIONAL DIGITAL AND ANALOG VOICE CLARITY

Codan’s second generation Digital Voice (DV) technology provides a quantum leap in voice communications. It significantly reduces the hiss, crackle, pops, and multipath effects typical of HF. The vocoders used provide voice quality experience that is similar to cellular phones, and the modem technology ensures continued operation in degraded and fading channels.

When analog SSB mode is needed, Envoy’s patented Easitalk™ DSP algorithm works to actively remove background noise and interfering tones. During transmission, Codan’s TalkPower feature dynamically compresses and shapes the frequency response of the voice signal to maximise transmit power and intelligibility. A syllabic squelch only opens the speaker mute when speech signals are present to eliminate background noise.

SOFTWARE-DEFINED ARCHITECTURE

Envoy uses latest-generation high-performance Digital Signal Processor (DSP), Field-Programmable Gate Array (FPGA) and microprocessor technology. This provides market-leading performance and future upgradability through software updates to install new capabilities and support evolving standards.

IP / ETHERNET / USB CONNECTIVITY

Envoy IP / Ethernet connectivity enables centralised programming, maintenance and operation of network connected stations. Envoy handsets and consoles include USB ports for convenient programming and maintenance via conventional USB cable connection or via attached memory stick.

UNPARALLELED RF PERFORMANCE

Envoy’s strong RF performance is paramount to effective long range communications. Unlike many Software-Defined Radios, Envoy provides specifications superior or equal to high-end analog products. For example, to maximise range, receiver sensitivity is a massive -125 dBm, and blocking is greater than 100 dB, minimising chances of interference from adjacent stations. Envoy’s transmitter is also extremely clean, with carrier, spurious and harmonics more than 65 dB below PEP. Envoy also supports connection of dual antennas for short and long range propagation.
Codan's Windows-based TPS-3250 Radio programming software can be used to build profiles, which can be conveniently deployed via direct connection, IP or USB memory stick. Once profiled, Envoy can be easily locked down using an administrator PIN; ensuring important settings are not tampered with.

Envoy’s large high-resolution, sunlight-readable colour display, and intuitive menu system makes operation similar to modern smartphones. Making calls is as simple as navigating to your contact list, locating the desired contact and pressing the “call” button. Other common actions are supported through customisable hotkeys for single or multiple step operations.

For optimal user safety, Envoy includes a dedicated Emergency key. This can be configured to automatically contact one or more stations, embedding the Envoy’s GPS coordinates into the emergency signal.

To minimise training burden for non-English speaking users, Envoy’s user interface is also made available in a variety of other languages.

**ALE and SELCALL CALLING CAPABILITY**

The Envoy includes the latest generation 3G Automatic Link Establishment (ALE) technology providing the user with fast linking and data capabilities. Messages are transferred securely by employing link protection and data encryption. Envoy supports current calling standards including CCR compliant Selcall; FED-STD-1045 ALE and ITC Certified MIL-STD-188-141B ALE. Envoy enables concurrent operation of different calling systems, and automatically optimises channel scan times. This ensures full interoperability with earlier generation Codan, competitor and legacy radios.

Selcall provides the capability to voice or message call an individual radio, group of radios, or broadcast to all radios. ALE also provides these capabilities, plus built-in intelligence to automatically select the optimum channel (frequency) to ensure the best chance of linking and the clearest signal. The MIL-STD ALE option adds NET calling (similar to Talkgroups), on-air Link Quality Assessment (LQA) exchange, and advanced addressing types.

Envoy’s ALE also includes Codan Automated Link Management (CALM™). This technology is fully compatible with conventional standards-based ALE, but includes significant proprietary enhancements to improve performance. As an example, ALE LQA is internally recorded in a three-dimensional matrix against time. This results in far reduced on-air soundings and improved probability of linking. CALM™ also includes special call types including “first-in-list” for fastest possible link, and “best-in-list” for optimised data.

**INTEGRAL DATA CAPABILITY**

Envoy supports MIL-STD-188-110A/B high-speed data operation up to 9600 bit/s. The modem uses interleavers, tone-excision and turbo-decoding for optimum performance in difficult channels. When combined with Codan’s STANAG 5066 compliant RCSO-C Email software, email over HF can be achieved from standard SMTP/POP email clients such as Microsoft® Outlook. Emails are automatically compressed and the data rate is optimised to channel conditions.

Envoy also supports Codan’s robust low-rate data modem waveform, which is compatible with our 3012 / 3212 external modems. This modem supports data operation to 2400 bit/s (typically 6000 bit/s including compression). It’s available with Windows based Email / Chat software, or can be used for custom data / telemetry applications via its standards-based AT command interface.

**ENCRYPTION**

Envoy has a choice of encryption options to suit the required level of communications security. For communications up to “top secret” classification, AES 256-bit security is available for both Digital Voice and data encryption, supported with up to 256 internally pre-programmed encryption keys.

For voice only applications, Codan’s CES-128 DSP-based encryption option is available, with up to 97 16-digit user programmable keys. An additional layer of security is provided by assigning a PIN number during a secure communications session.

Both of these options are supported by Codan’s Key Management Software (KMS) application suite, which enables generation, management and deployment of keys. For convenience, keys can also be filled using a conventional USB memory stick.

For basic voice security, the CVIS option provides a 32 code DSP-based scrambler.

All voice encryption options for Envoy can be activated by a single hotkey, and are fully integrated with core Radio functions like Selcall and ALE scanning to ensure simplicity of operation. Envoy can be configured to automatically set the encryptor type and key index per channel or network. This enables interoperability between Codan HF networks operating with disparate encryption types.

**GPS SUPPORT**

Envoy supports connection of GPS via NMEA0183 compatible GPS receivers. This enables polling and sending of GPS positions over air. Distance and bearing to other users or programmable waypoints can be displayed on an intuitive graphical display. When used with mapping software deployed mobiles vehicles can be graphically tracked.

**VERSATILE DESIGN FOR MOBILE, BASE AND COMPLEX SYSTEMS**

Envoy is designed using a modular approach, with a handset for mobile applications and a desk console for bases. The use of IP over Ethernet enables geographical separation of radio and console, without the need for expensive adapter devices. Envoy can also be supplied in rapidly deployable cases.

**SOFTWARE APPLICATIONS**

- TPS-3250 Radio Programming Software
- Internav™ GPS Tracking
- RCSO-C Email (for high-speed modem)
- Codan Chat (for robust low rate modem)
- SprintChat and SprintNet

**ACCESSORIES**

- 500 W / 1 kW High Power Amplifiers
- 3040 Automatic Whip Antenna
- 3033 Telephone Interconnect
- Dual-port Antenna Selector
- Vehicle installation kit (including dash-mount)
- Handset dash-mount
- Virtual Control Point
- Satellite/cellular modem for Codan Convoy

# SPECIFICATIONS

## Channels and Scanning
Up to 1000 simplex or semi-duplex. Up to 20 scan groups. Simultaneous scanning for Selcall (ALE/CCIR) and voice. Dwell time 125 ms to 9.9 s, adjustable.

## Contacts List
Up to 500 entries

## SDR processing architecture
DSP: 456 MHz, 32-bit. FPGA: 500,000 gate. MCU: ARM9, 300 MHz, 32-bit

## Interfaces

## Audio response
Less than 3 dB variation from 300 Hz to 3 kHz (with optional 2.7 kHz filter)

## Compliance

## Temperature range and Humidity
–30 to +60°C, 95% RH maximum, non-condensing

## RF
### Frequency range
| Tx: 1.6 to 30 MHz; Rx: 250 kHz to 30 MHz | Frequency stability: ±0.3 ppm from –30°C to +60°C |

### Modes
Single sideband (J3E), USB, LSB, AM (H3E), CW (J2A), AFSK (J2B), F1B (FSK) (software defined)

### Output power
125 W PEP ±1 dB (two-tone or voice), user-programmable in 1 W steps (low/medium/high)

### Duty cycle
100% Voice/Data with optional Fan

### RF output impedance
50 Ω

### Filter bandwidths
2.4 kHz standard (500 Hz, 2.7 kHz, and 3 kHz optional)

### Transmitter specifications
- Spurious and harmonic emissions: Better than <69 dB below PEP
- Intermodulation products: 40 dB below PEP
- Carrier suppression: Better than 65 dB below PEP
- Sideband suppression: 70 dB below PEP

### Receiver specifications
- Sensitivity: 0.12 μV, –125 dBm for 10 dB SINAD
- Selectivity: >70 dB at –1 kHz and +4 kHz ref SCF USB
- Blocking: >100 dB at ±50 kHz
- Image rejection: >85 dB
- Intermodulation: Unwanted signal >92 dB below desired signal
- Intercept point: +38 dBm

### Switching speed
<25 ms (Tx:Rx or Rx:Tx)

## ELECTRICAL AND MECHANICAL
### Operating range
10.8 to 15 V DC (12 V Nominal)

### Supply current
Rx: 500 mA (backlight min, audio muted); Tx: Two-tone 12.5 A typical, average speech 8 A

### Protection
Over-voltage/under-voltage/over-temperature/reverse polarity

### Size and Weight
| 2210 RF Unit: 210 x 270 x 65 mm (8.3 x 10.6 x 2.6 in) | 2.8 kg (6.2 lb) |
| 2220/1 Handset: 75 x 32 x 151 mm (3.0 x 1.3 x 5.9 in) | 0.3 kg (0.7 lb) |
| 2230 Console: 190 x 228 x 79 mm (7.5 x 9.0 x 3.1 in) | 1.1 kg (2.4 lb) |

### Ingress protection
IP43, MIL-STD-810G method 510.5

### Environmental standards
MIL-STD-810G (Dust, Shock, Vibration, Humidity, Fungus, Altitude)

## OTHER
### Data modem (robust low rate)
CHIRP/QPSK, 2400 bit/s (up to 6000 bit/s using in-built compression)

### Data modem (high speed)
MIL-STD-188-110A/B, STANAG 4539, 75 to 9600 bit/s

### Encryption
CES-128, 97 x programmable 16-digit keys, 4-digit PIN (Voice only)
AES-256, 256 x programmable 256-bit keys (Voice/Data)

### Vocoder
MELPe (1200/2400 bit/s), TWELP (600/1200/2400 bit/s)
